

RAJARAM MAGAR

Full Stack Software Engineer — Payments, Distributed Systems & AI Tooling
Pune, Maharashtra | +91-8624955714 | rajarammagar101@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Fintech Full Stack Software Engineer with 3 years of experience delivering **high-throughput payment microservices (500K+ daily transactions)** across 10 African markets. Proven track record of owning **distributed system** architectures (Saga, Kafka) and solely building AI-driven internal tooling that reduced manual workflows from 8 hours to 60 seconds.

EXPERIENCE

Software Engineer | Tata Consultancy Services (TCS) — Pune Aug 2023 – Present
Client: Leading South African Bank | Payments, Digital Wallets & Financial Systems | 500K+ Daily Transactions

Payment Systems & Digital Wallet Engineering

- **Engineered high-throughput** Spring Boot microservices **processing 500K+ daily financial transactions** across virtual prepaid card and digital wallet ecosystems operating across 10 African markets.
- **Designed and implemented Saga-pattern** 2-leg transaction engine: Leg 1 debits agent account → credits GL; Leg 2 debits GL → credits user — with automated rollback on Leg 2 failure, guaranteeing distributed consistency.
- **Integrated Apache Kafka event-driven** streams with Dead Letter Queues (**DLQ**) to asynchronously publish and consume 500K+ daily notification and transaction reversal events.
- **Proposed and delivered Strategy pattern** replacing rigid conditional logic across CASAtocASA, GLtoGL, GLtoCASA payment flows — adopted in production, improving maintainability across the team.
- **Recommended and drove CBS split architecture** separating 4-country and 6-country CBS variants into independent services — adopted by lead, reducing coupling and improving long-term scalability.
- **Independently traced and resolved silent failure in reversal flows** via ELK logs, eliminating cross-team reconciliation failures in production.
- Built **idempotent transaction** mechanisms; **secured APIs** via Spring Security and RBAC; **maintained 80%+ unit test coverage** (JUnit, Mockito); **containerised** all services with Docker and Jenkins CI/CD.
- **Mentored 8–10 junior engineers** on payment flows, SOLID principles, and code reviews, while supporting tech leads on internal **RAG and LLM integrations**.
- **Evaluated candidates** on Java and system design for hiring panels; **collaborated with BAs** on design reviews, estimations, and API service decomposition.

AI Automation & Internal Tooling

- **Solely designed and built an AI-powered BIAN mapping platform** (Spring Boot + GPT-4o); Engineered a 2-leg LLM Vision pipeline to parse API spec PDFs and automate a 4–8 hour manual process in under 60 seconds; **Developed a responsive React.js conversational UI** for real-time interaction mapping.
- **Led DataGrid → PostgreSQL migration**; engineered a **React administration dashboard** for real-time CRUD operations and audit trail monitoring alongside a manually hand written thread-safe ConcurrentHashMap cache.
- **Implemented RAG pipeline using vector DB** over internal Confluence pages — enabling LLM to reference architectural precedents during mapping for improved accuracy on reused services.

TECHNICAL SKILLS

Languages:	Java, SQL, Python, JavaScript
Backend:	Spring Boot, Spring Security, Spring MVC, JPA/Hibernate, REST, SOAP, HttpClient
Frontend:	React JS, HTML, CSS
Databases:	PostgreSQL, MySQL, MongoDB
Messaging:	Kafka, RabbitMQ
Cloud & DevOps:	AWS EC2/S3, Docker, Kubernetes, Jenkins, OpenShift, GitHub Actions, CI/CD
Tools & Standards:	ELK Stack (Kibana), Git, Maven, LLM Integration (GPT-4o), BIAN Standards, ISO 20022
Core Concepts:	Microservices, Distributed Systems, Event-Driven Architecture, Saga Pattern, CQRS, Design Patterns (Factory, Strategy, Builder), SOLID, Multithreading, System Design

EDUCATION

B.Tech in Computer Science & Engineering — GPA: 9.56 / 10 Aug 2019 – Jun 2023
Government College of Engineering, Chandrapur

CERTIFICATIONS & RECOGNITION

- **AWS Certified** Solutions Architect – Associate
- Google Cloud Certified **Generative AI Leader**
- Recognised with **Best Employee award** at project level (TCS)
- **Rated A-Band for 2 consecutive appraisal** cycles at TCS — top performance tier
